

IN THE CLAIMS:

The text of all pending claims, (including withdrawn claims) is set forth below. Cancelled and not entered claims are indicated with claim number and status only. The claims as listed below show added text with underlining and deleted text with ~~strikethrough~~. The status of each claim is indicated with one of (original), (currently amended), (cancelled), (withdrawn), (new), (previously presented), or (not entered).

Please AMEND claims 1-4 in accordance with the following:

Claim 1 (Currently Amended): A data storage medium comprising:
main data including audio data and/or video data;
sub data recorded in a separate bitstream from the main data ~~and to be~~ reproduced in
synchronization with the main data by a reproducing apparatus; and
navigation information defining a relation required for the main data and the sub data to
be output in synchronization with each other by the reproducing apparatus.

Claim 2 (Currently Amended): The data storage medium of claim 1, further
comprising extra data recorded in a separate bitstream from the main data and the sub data
~~and to be~~ reproduced in connection with the main data by the reproducing apparatus,
wherein the navigation information further defines a relation required for the main data
and the extra data to be output in ~~connection~~ synchronization with each other by the reproducing
apparatus.

Claim 3 (Currently Amended): The data storage medium of claim 2, wherein the
main data are received and encoded by an internal encoder or are input through a digital
interface and recorded on the data storage medium.

Claim 4 (Currently Amended): The data storage medium of claim 2, wherein the
sub data and/or the extra data are received and encoded by an internal encoder or are input
through the digital interface and recorded on the data storage medium.

Claim 5 (Original): A recording method comprising:

- (a) recording main data including audio data and/or video data;
- (b) recording sub data to be reproduced in synchronization with the main data in a separate bitstream from the main data; and
- (c) recording navigation information defining a relation required for the main data and the sub data to be reproduced in synchronization with each other.

Claim 6 (Original): The recording method of claim 5, further comprising:

- (d) recording extra data to be reproduced in connection with the main data in a separate bitstream from the main data and the sub data; and
- (e) recording navigation information defining a relation required for the main data and the extra data to be output in connection with each other.

Claim 7 (Original): The recording method of claim 5, wherein step (a) comprises:

- (a1) receiving the main data through a digital interface; and
- (a2) recording the received main data.

Claim 8 (Original): The recording method of claim 5, wherein step (a) comprises:

- (a1) receiving the main data as analog signal,
- (a2) encoding the received main data; and
- (a3) recording the encoded main data.

Claim 9 (Original): The recording method of claim 5, wherein step (b) comprises:

- (b1) receiving the sub data through the digital interface; and
- (b2) recording the received sub data.

Claim 10 (Original): The recording method of claim 5, wherein step (b) comprises:

- (b1) receiving the sub data as analog signal,
- (b2) encoding the received sub data; and

(b3) recording the encoded sub data.

Claim 11 (Original): The recording method of claim 6, wherein step (c) comprises:

- (c1) receiving the extra data through the digital interface; and
- (c2) recording the received extra data.

Claim 12 (Original): The recording method of claim 6, wherein step (c) comprises:

- (c1) receiving the extra data as analog signal,
- (c2) encoding the received extra data; and
- (c3) recording the encoded extra data.

Claim 13 (Currently Amended): A reproducing method comprising:
(a) reading main data including audio data and/or video data;
(b) reading sub data recorded in a separate bitstream from the main data, which is reproduced in synchronization with the main data; and
(c) mixing the read main data and the read sub data based on navigation information defining a relation required for the read main data and the read sub data to be reproduced in synchronization with each other.

Claim 14 (Previously Presented): The reproducing method of claim 13, further comprising (d1) outputting the mixed main data and sub data through a digital interface.

Claim 15 (Previously Presented): The reproducing method of claim 13, further comprising (d2) decoding the mixed main data and sub data.

Claim 16 (Currently Amended): The reproducing method of claim 13, wherein step (c) comprises:
(c1) reading the navigation information defining a relation required for the read main data and sub data to be reproduced in synchronization with each other; and
(c2) mixing the read main data and the read sub data based upon the navigation

information.

Claim 17 (Currently Amended): A reproducing method comprising:

- (a) reading main data including audio data and/or video data;
- (b) reading sub data recorded in a separate bitstream from the main data, which is reproduced in synchronization with the main data;
- (c) reading extra data recorded in a separate bitstream from the main data and the sub data, which is reproduced in connection with the main data; and
- (d) mixing the read main data, the read sub data, and the read extra data based on navigation information defining a relation required for the read main data and sub data to be reproduced in synchronization with each other and for the read main data and extra data to be reproduced in connection with each other.

Claim 18 (Previously Presented): The reproducing method of claim 17, further comprising (e1) outputting the mixed main data, sub data, and extra data through a digital interface.

Claim 19 (Previously Presented): The reproducing method of claim 17, further comprising (e2) decoding the mixed main data, sub data, and extra data.

Claim 20 (Currently Amended): The reproducing method of claim 17, wherein step (d) comprises:

- (d1) reading the navigation information defining a relation required for the read main data and sub data to be reproduced in synchronization with each other and for the read main data and extra data to be reproduced in connection with each other; and
- (d2) mixing the read main data, the read sub data, and the read extra data based upon the navigation information.

Claim 21 (Currently Amended): A reproducing method comprising:

- (a) reading sub data recorded in a separate bitstream from main data including audio data and/or video data, which is reproduced in synchronization with the main data;
- (b) reading extra data recorded in a separate bitstream from the main data and the sub

data, which is reproduced in connection with the main data; and

(c) mixing the read sub data and the read extra data based on navigation information defining a relation required for the read sub data and extra data to be reproduced in connection with each other.

Claim 22 (Previously Presented): The reproducing method of claim 21, further comprising (d1) outputting the mixed sub data and extra data through a digital interface.

Claim 23 (Previously Presented): The reproducing method of claim 21, further comprising (d2) decoding the mixed sub data and extra data.

Claim 24 (Currently Amended): The reproducing method of claim 21, wherein step (c) comprises:

(c1) reading the navigation information defining a relation required for the read sub data and extra data to be reproduced in connection with each other; and

(c2) mixing the read sub data and the extra data based upon the navigation information.

Claims 25-41 (CANCELLED).

Claim 42 (Previously Presented) The data storage medium of claim 1, wherein the navigation data comprises identifiers for the main data and playback time information for the sub data corresponding to the main data.

Claim 43 (Previously Presented) The recording method of claim 5, wherein the navigation data comprises identifiers for the main data and playback time information for the sub data corresponding to the main data.

Claim 44 (Previously Presented) The reproducing method of claim 16, wherein the navigation data comprises identifiers for the main data and playback time information for the sub data corresponding to the main data.

Claim 45 (Previously Presented) The reproducing method of claim 20,

wherein the navigation data comprises identifiers for the main data and playback time information for the sub data and/or the extra data corresponding to the main data.

Claim 46 (Previously Presented) The reproducing method of claim 24,
wherein the navigation data comprises playback time information for the sub data and the extra data corresponding to the main data.
